

# EO Topic 24: Building mapping through deep learning

Jiong (Jon) Wang  
ITC, University of Twente

20<sup>th</sup>, Jan. 2022

**IDEA**  
**MAP**  
**SUDAN**

African Population and  
Health Research Center

**nuffic**  
meet the world

# Overview

---

Recap: Neural Networks

Recap: The CNN

Model architecture

Training configuration

Building mapping

- **Recap: The Neural Networks**
- **Recap: The CNN**
- **Model architecture**
- **Training Configuration**
- **Building mapping**

# Machine learning with the Neural Networks

## Recap: Neural Networks

Recap: The CNN

Model architecture

Training configuration

Building mapping

- **Inference:** constructing a certain mapping/relationship between known input and output
- **Prediction:** estimate unknown output with new input

# The CNN: for different purposes

---

## Recap: Neural Networks

Recap: The CNN

Model architecture

Training configuration

Building mapping

# The CNN: for different purposes

---

<b>Recap: Neural Networks</b>
Recap: The CNN
Model architecture
Training configuration
Building mapping

# The CNN: for different purposes

## Recap: Neural Networks

Recap: The CNN

Model architecture

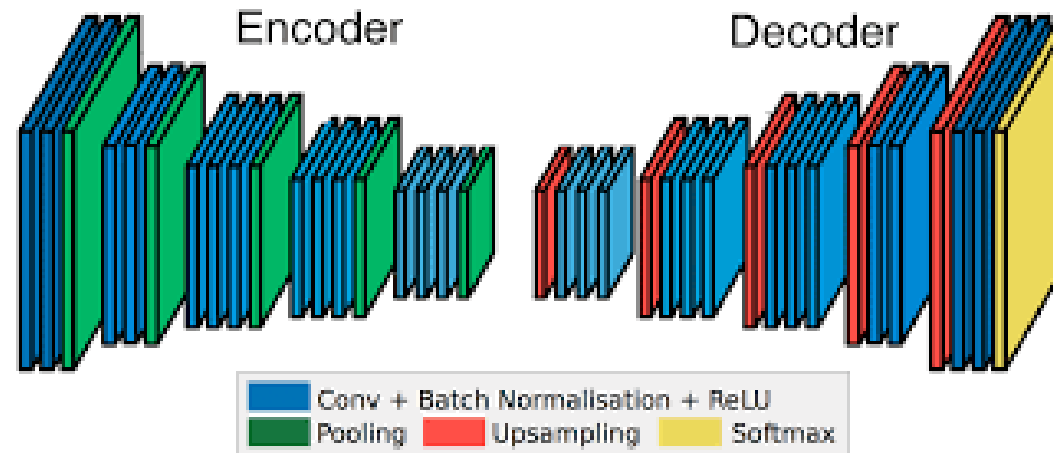

Training configuration

Building mapping

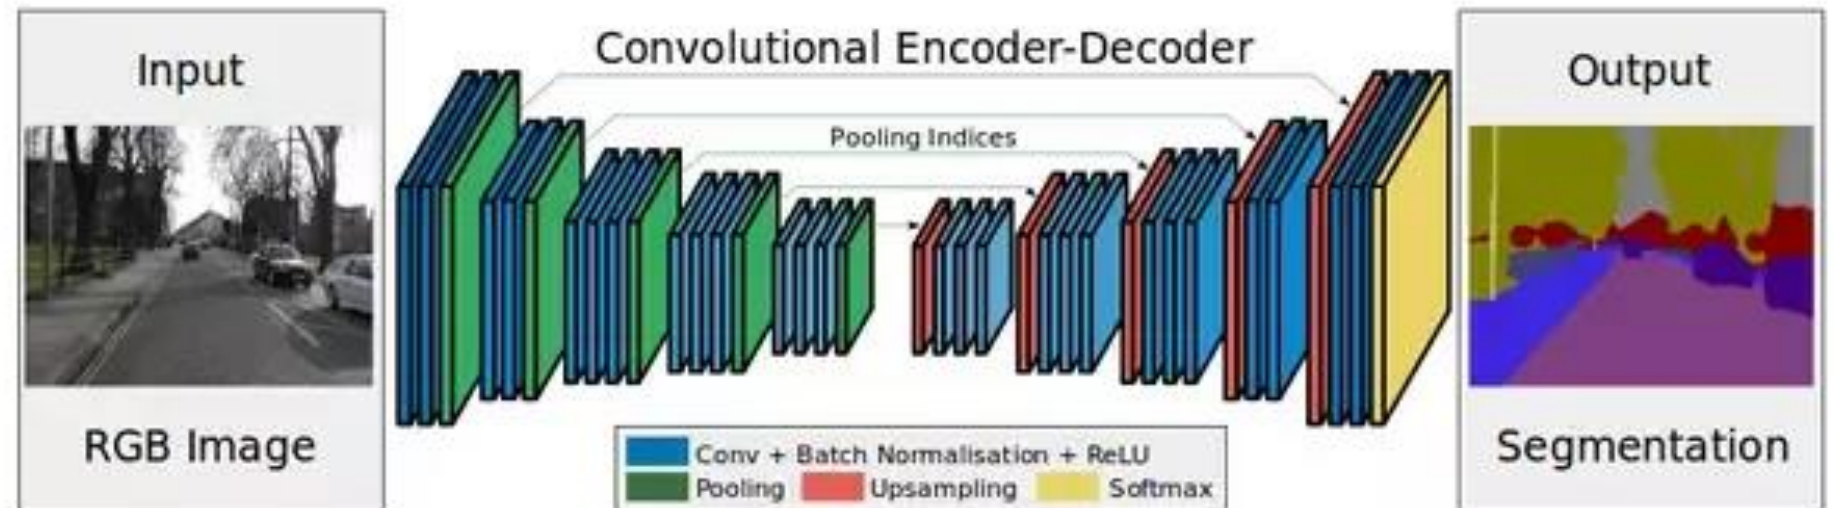

# For image segmentations: AutoEncoder

Recap: Neural Networks
<b>Recap: The CNN</b>
Model architecture
Training configuration
Building mapping

# For image segmentations: AutoEncoder

- Recap: Neural Networks
- Recap: The CNN**
- Model architecture
- Training configuration
- Building mapping

# Variations of encoder-decoder architecture

Recap: Neural Networks
<b>Recap: The CNN</b>
Model architecture
Training configuration
Building mapping

Recap: Neural Networks

Recap: The CNN

Model architecture

**Training configuration**

Building mapping

# Training configuration

- **Training data preparation: generalizable**
- **Model configuration: complexity, over/under-fit**

# Building mapping: Important!

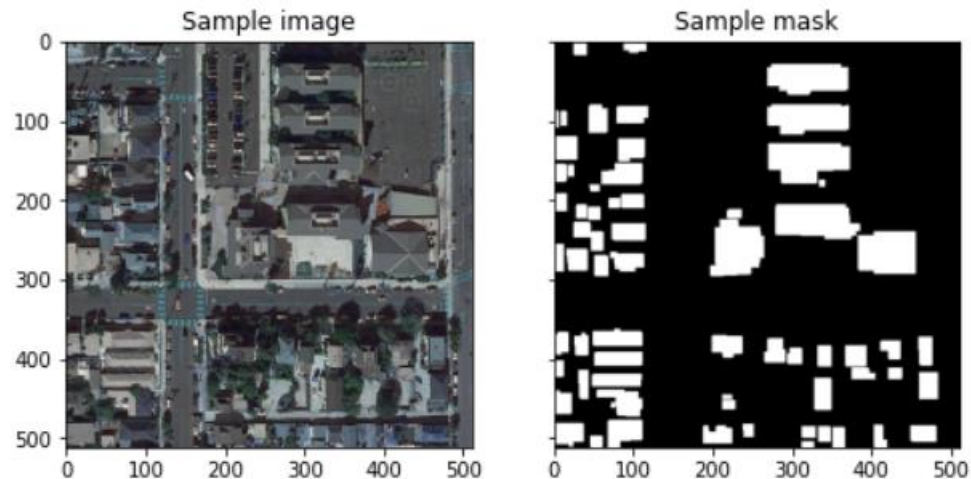

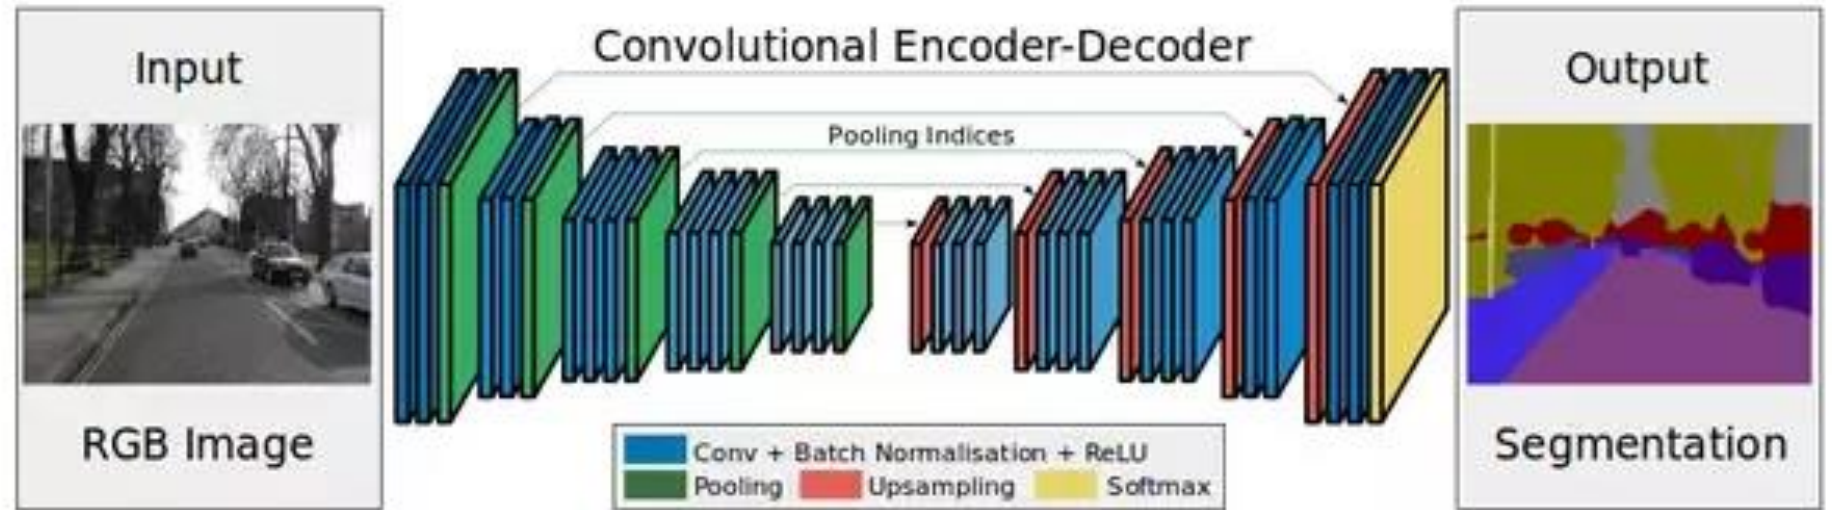

Recap: Neural Networks
Recap: The CNN
Model architecture
Training configuration
<b>Building mapping</b>

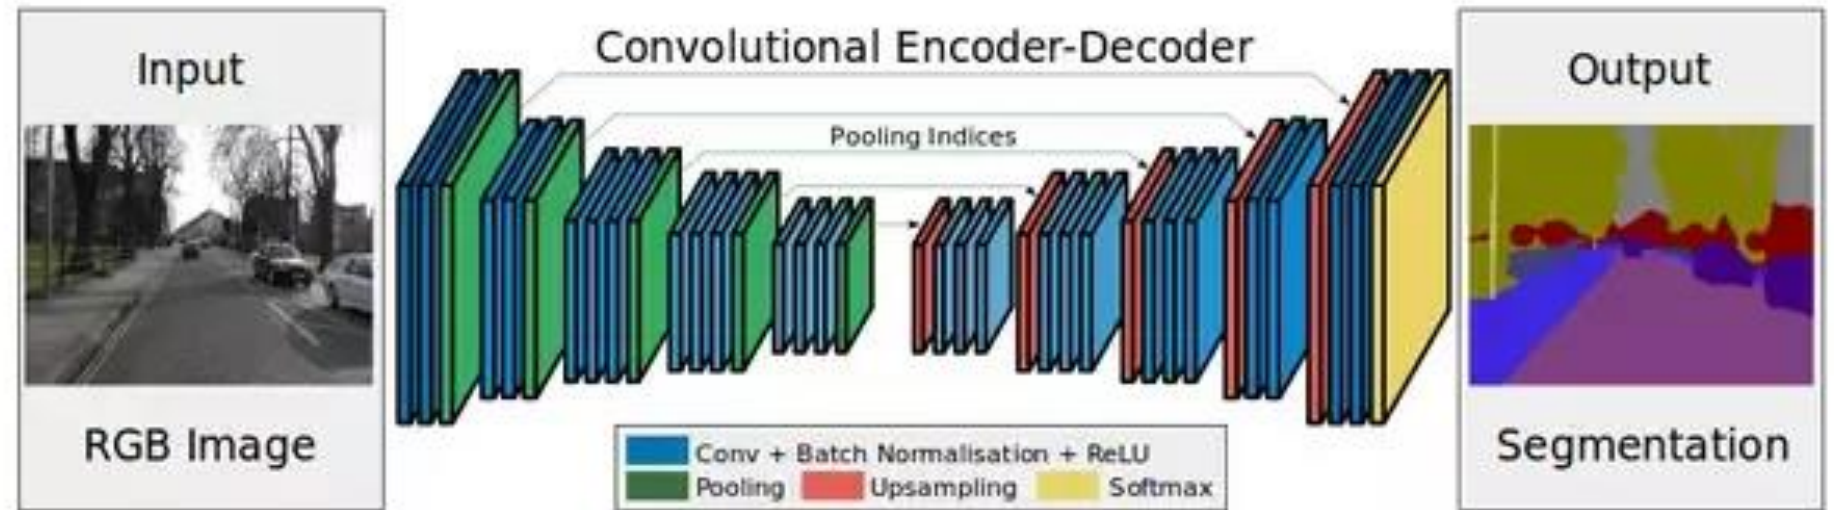

# Training labels for the model

- Recap: Neural Networks
- Recap: The CNN
- Model architecture
- Training configuration
- Building mapping**

# Training labels for the model

- Recap: Neural Networks
- Recap: The CNN
- Model architecture
- Training configuration
- Building mapping**

Recap: Neural Networks

Recap: The CNN

Model architecture

Training configuration

**Building mapping**

## Overview of the exercise

---

- **Python notebook on CRIB, ITC**
- **Load and preprocess data**
- **Prepare training data**
- **Training Configuration: architecture, learning rate, loss, epochs**
- **Prediction**
